

Lojain Idris  
Anaconda account  
Notebook Jupyter

The screenshot shows the Anaconda website's landing page. The header includes the Anaconda logo, navigation links (Products, Solutions, Resources, Partners, Company), and buttons for 'Free Download', 'Sign Up', and 'Sign In'. The main content area features a large 'Thank you for downloading' message, a link to download the version if it wasn't, and a section for 'Finish creating your Cloud account' with a 'Create Account' button. Overlaid on this is the 'Anaconda3 2024.10-1 (64-bit) Setup' window, which is in the 'Installing' phase, showing a progress bar for 'Setting up the package cache...' and a 'Show details' button. A large green checkmark is drawn over the installation window.

This block contains two screenshots. The left screenshot shows the Anaconda Navigator desktop application interface, with a sidebar containing links to Home, Environments, Learning, and Community, and a main panel displaying application recommendations like PyCharm and Anaconda Cloud. The right screenshot is a web browser window showing the 'Installation Success' page at 'https://anaconda.cloud/local-login-success'. The page displays the Anaconda logo, the message 'Success! You are now logged in.', and instructions to close the page or view documentation. A cookie consent banner is visible at the bottom of the browser window.
